Press Release

Private Mobile Networks recognised by IT industry award

~ Innovative mobile technology shortlisted by the BCS ~

North Yorkshire, UK – 29th October 2007 – Private Mobile Networks Ltd, the UK provider of private GSM network technology, today announced it has been shortlisted as a 'Supplier of the Year' finalist in the British Computer Society IT Industry Awards.

The BCS IT Industry Awards are the leading hallmark of success amongst practitioners in the IT industry today. These cross-industry awards recognise, promote and acclaim excellence, professionalism, innovation and the outstanding achievements to which individuals and groups contribute.

"Since we launched the concept of a private mobile network back in 2005, we have worked incredibly hard to establish the technology and have won significant customers across the world," comments Dean Parsons, Managing Director of Private Mobile Networks. "Launching a new product category is always a challenge, but we are grateful that influential organisations such as the BCS recognise the contribution we have made in delivering a technology that will help businesses both reduce costs and provide innovative solutions to long-standing problems," added Parsons.

The PMN solution creates a private GSM network to carry traffic between mobile phones within the coverage area and from mobile phones across intra-site IP networks, without incurring mobile operator call charges. The PMN solution provides Voice, SMS and high speed GPRS coverage, with full support for both open standard and traditional TDM-based PBXs.

Anna Duckworth, BCS Head of Corporate Marketing said, "Year-on-year, the standard of entries increases and this year is no exception, with innovative projects which showcase excellence in IT. The next stage of judging will be very difficult as our expert panel endeavours to select the outright winners for each award."

2007 marks the 50th Anniversary of the BCS and is a turning point in the Awards. For the first time, the three largest industry bodies, BCS, NCC and Intellect, come together to recognise achievement and innovation. The categories reflect the present and future of Information Technology in the United Kingdom and Europe. Winners will be announced at the Awards evening on 6th December 2007. For more information on the BCS awards, please visit <http://www.bcs.org>.

About TeleWare Group Plc.

TeleWare's applications provide business solutions for voice continuity, mobility and team working, fixed mobile convergence, DECT replacement, enterprise call control, telephony

migration and consolidation, voice portal solutions and seamless PBX and applications integration. Unparalleled interoperability enables seamless integration with a wide range of PBX and application vendors. A commitment to open standards ensures flexibility, freedom and choice.

TeleWare is a Microsoft gold partner, has certification for the quality standard ISO9001/2000 TickIT and has been awarded the Investors in People national standard for training and development of its employees to achieve its business goals.

TeleWare develops and delivers software based products and services in a variety of ways to suit the differing target markets. The TeleWare Group consists of TeleWare Plc, TeleWare Hosted Services, TeleWare Application Services and Private Mobile Networks Ltd.

TeleWare Plc: - The leading UK supplier of intelligent communications solutions provided as packaged and tailored application software. TeleWare's applications are delivered as on-premise or managed services to all sizes of businesses and as hosted platform solutions to service providers. TeleWare customers include over 23% of the FTSE 100 and approaching 21% of the top 1000 blue chip national and multinational companies.

TeleWare Hosted Services (THS): - THS supports the full applications portfolio delivered in a hosted environment across TDM or IP networks. The Hosted Services are brought to market through sales partners from data centres in Thirsk, Docklands and Heathrow and are available for deployment by independent service providers.

TeleWare Application Services (TAS): - TAS is an Application Service Provider (ASP) delivering services based on the TeleWare intelligent applications through BT Featurenet. TAS supports over 25,000 registered users delivering services such as personal numbering, auto attendant, unified and integrated messaging and IVR.

Private Mobile Networks (PMN): - Private Mobile Networks Ltd provides private GSM network solutions for deployment in remote sites, use as DECT replacement and for fixed mobile convergence by businesses.
